The short answer is no, the Library does not keep old examination papers. However, previous examination papers, usually for the preceding year, are made available for most courses on the student learning portal, myUnisa. If you have not yet done so, claim your free myLife email address and join myUnisa.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Stop! If you have been looking for the one resource for managing a business of any size, this is it. Based on the extensive business experience of five experts, this authoritative guide provides an in-depth look at what every leader must know about managing across departments, functions, divisions, or companies. Drawing on decades of combined experience, John Colley and colleagues detail the wide range of skills, tools, and conceptual understanding as well as the qualities of leadership that a successful general manager must acquire. In an era of specialization and specialists, the authors return due focus to the generalist. No other book so passionately and thoroughly examines the roles and responsibilities of the general manager and the full scope of this distinct, pressure-filled occupation. The authors explore the quantitative and qualitative aspects of the job and discuss how the skilled manager moves an organization from abstract goals to definitive action. For every profit center or plant manager, function head, division president, or CEO, this book is indispensable reading.

A best-seller completely revised and rewritten to conform to today's C++ usage.

New South African Keywords sets out to do two things. The first is to provide a guide to the key words and key concepts that have come to shape public and political thought and debate in South Africa since 1994. The second purpose is to provide a compendium of cutting-edge thinking on the new society. The result is a concise and insightful guide to postapartheid South Africa, which should be useful to students, citizens, tourists, business managers, decision makers—in fact, to anyone wanting to make sense of South African society today.

"The new book Mapping Ecosystem Services provides a comprehensive collection of theories, methods and practical applications of ecosystem services (ES) mapping, for the first time bringing together valuable knowledge and techniques from leading international experts in the field." (www.eurekalert.org).

There are many practical textbooks explaining how taxation is applied and calculated but few ever deal thoroughly with the theory behind the practice. This book concisely addresses the principles and theories behind taxation in an accessible and internationally relevant way. It encourages readers to think through and develop an understanding of why taxation is imposed, the different means by which it is imposed and the nature of the problems inherent in this imposition. It addresses background issues, fundamental principles and emerging topics such as: the philosophy and history of taxation; types of taxation; and international issues, including double taxation treaties, residence and transfer prices. This text is essential reading for students of taxation and provides a valuable introduction for students of business, finance and accounting.
