This volume constitutes the refereed proceedings of the 19th International Symposium on Graph Drawing, GD 2010, held in Eindhoven, The Netherlands, during September 2011. The 34 revised full papers presented together with 3 revised short and 6

poster papers were carefully reviewed and selected from 88 submissions. Furthermore, the proceedings contain the abstracts of two invited talks and to commemorate Kozo Sugiyama and his pioneering research in graph drawing, the proceedings include an obituary. A unique and fun part of the symposium is the Graph Drawing Contest, which is part of the Graph Drawing Challenge. This year was the 18th edition. A report on the contest is included at the end of the proceedings.

The book derives from the experiences of the authors as lecturers and tutors at different international summer schools on reality-based surveying and 3D modelling in the field of archaeology and cultural heritage.

The book is organized in three main sections. The first part aims to introduce and discuss the contribution of geomatic techniques in archaeology and more generally in cultural heritage with particular attentions to the 3D domain. The second part is focused on the main areas involved in the implementation of 3D surveys (aerial and terrestrial LiDAR, photogrammetry, remote sensing), 3D documentations, GIS and 3D interpretations (virtual and cyber archaeology). The last section collects some relevant case studies showing the extraordinary contribution that geomatic techniques can give to archaeological research and cultural heritage at different scales of detail: object, site, landscape.

This poetry book is a compilation of 21

poems that I wrote while in college.

This brilliantly argued, first-hand account of the authors major discoveries at the renowned archaeological site Çatalhöyük in Turkey, described by Professor Colin Renfrew as one of the most ambitious excavation projects currently in progress, is now available in paperback. A tour de force of archaeological writing, it offers many insights into past lives and momentous events, and is superbly illustrated with images of the art, the artifacts and the excavations at this world-famous dig. It will be a must-read for archaeologists and historians everywhere.

Undergraduate students of physics and related sciences will find this a stimulating account of the basic physics and its applications. Only an elementary knowledge of kinetic theory and atomic physics, as well as the rudiments of quantum theory, are presupposed for an understanding of this book. *Statistical Physics, Second Edition* features: A fully integrated treatment of thermodynamics and statistical mechanics. ambitious reader. Sets of problems at the end of each chapter to help student understanding. Hints for solving the problems are given in an Appendix.

This provocative introduction examines the most important new school of archaeological thought and practice to have emerged over the last two decades and provides students with an assessment of the impact and importance of recent theoretical debates.

Recipient of the Jo Anne Stolaroff Cotsen Prize Occupied from around 7500 BC to 5700 BC, the large Neolithic and Chalcolithic settlement of Catalhoyuk in Anatolia is composed entirely of domestic buildings; no public buildings have been identified.

First excavated in the early 1960s, the site was left untouched until 1993. During the summers of 1997-2003 a team from the University of California at Berkeley (the BACH team) excavated an area at the northern end of the East Mound of Catalhoyuk. The houses there date predominantly to the late Aceramic and early Ceramic Neolithic, around 7000 BC. Last House on the Hill is the final report of the BACH excavations. This volume comprises both interpretive chapters and empirical data from the excavations and their materials. The research of the BACH team focuses on the lives and life histories of houses and people, the use of digital technologies in documenting and sharing the archaeological process, the senses of place, and the nature of cultural heritage and our public

The proceedings to "Serious Games on the Move 08" will contain all results of this conference on game software applications that are designed to do more than entertain. The focus of the contents lie on research results and developments in the rapidly moving field of serious games and their potential use in education and training as well as in the presentation of several showcases. The proceedings will address the following three topics:

1. Designing serious games: This topic will include innovations in the design of serious games, in particular games for use in education and training environments.
2. Embedding serious games and virtual worlds within learning programmes: Original research papers and case studies that

investigate the potential for integration of serious games and virtual worlds within programmes of education and training will be the core content of this theme. 3. Tools, technologies and platforms: Under this topic the proceedings will provide information relating to serious games technologies.
