Europe and antitrust law in the United States are designed primarily to protect business competitors (and in Europe to promote market integration), and it is only incidentally that such law may also serve to protect consumers. That is the essential starting point of this penetrating critique. The author

explores the extent to which US antitrust law and EC competition law adequately safeguard consumer interests.

Specifically, he shows how the two jurisdictions have gone about evaluating collusive practices, abusive conduct by dominant firms and merger activity, and how the policies thus
