As the world of work has changed, the role of human resources has evolved significantly. It is important to understand the historical backdrop, because it has been fundamental in shaping what HR is today. So far, we charted the progression of the function up to the 1980s. During that decade opinion around US-style human resource management was polarised.

The evolution of HR: 1984 to 2014 and beyond, part two

Evolution of the Horse. The evolutionary lineage of the horse, from its origins during the Eocene Epoch (55.8 million to 33.9 million years ago) through the present, is among the best documented in all paleontology. During the early Eocene there appeared the first ancestral horse, a hoofed browsing mammal designated correctly as Hyracotherium but more commonly called Eohippus, the dawn horse.
