Did America's fortieth president lead a conservative counterrevolution that left liberalism gasping for air? The answer, for both his admirers and his detractors, is often "yes." In Morning in America, Gil Troy argues that the Great Communicator was also the Great Conciliator. His pioneering and lively reassessment of Ronald Reagan's legacy takes us through the 1980s in ten year-by-year chapters, integrating the story of the Reagan presidency with stories of the decade's cultural icons and watershed moments-from personalities to popular television shows. One such watershed moment was the 1984 Los Angeles Olympics. With the trauma of Vietnam fading, the triumph of America's 1983 invasion of tiny Grenada still fresh, and a reviving economy, Americans geared up for a festival of international harmony that-spurred on by an entertainment-focused news media, corporate sponsors, and the President himself-became a celebration of the good old U.S.A. At the Games' opening, Reagan presided over a thousand-voice choir, a 750-member marching band, and a 90,000-strong teary-eyed audience singing "America the Beautiful!" while waving thousands of flags. Reagan emerges more as happy warrior than angry ideologue, as a big-picture man better at setting America's mood than implementing his program. With a vigorous Democratic opposition, Reagan's own affability, and other limiting factors, the eighties were less counterrevolutionary than many believe. Many sixties' innovations went mainstream, from civil rights to feminism. Reagan fostered a political culture centered on individualism and consumption-finding common ground between the right and the left. Written with verve, Morning in America is both a major new look at one of America's most influential modern-day presidents and the definitive story of a decade that continues to shape our times.

“Updates Robert Louis Stevenson’s classic story . . . Teens who enjoy brooding love stories will not be disappointed” (School Library Journal). Jill Jekel has always obeyed her parents’ rules—especially the one about never opening the mysterious, old box in her father’s office. But when her dad is murdered, and her college savings disappear, she’s tempted to peek inside, as the contents might be the key to a lucrative chemistry scholarship. To improve her odds, Jill enlists the help of gorgeous, brooding Tristen Hyde, who has his own dark secrets locked away. As a team, Jekel and Hyde recreate experiments based on the classic novel, hoping not only to win a prize, but to save Tristen’s sanity—and maybe his life. But Jill’s accidental taste of a formula unleashes her darkest nature and compels her to risk everything—even Tristen’s love—just for the thrill of being bad. “Fantaskey’s latest novel deliberately evokes the doppelganger theme and questionable experiments of Stevenson’s *The Strange Case of Dr. Jekyll and Mr. Hyde*. It also owes a great deal to Stephenie Meyer’s *Twilight* series . . . Fans of the genre won’t be able to resist this slick genre update.” [Booklist](#)

Perspective is a powerful thing. Andy Andrews has spent the past five years doing a double take at every white-haired old man he sees, hoping to have just one more conversation with the person to whom he owes his life. Through a chance encounter at a local bookstore, Andy is reunited with the man who changed everything for him — Jones, also known as “The Noticer.” As the story unfolds, Jones uses his unique talent of noticing little things that make a big difference. And these “little things” grant the people of Fairhope, Alabama, a life-changing gift - perspective. Along the way, families will be united, financial opportunities will be created, and readers will be left with powerfully simple solutions to the everyday problems we all face. Through the lens of a parenting class at the Grand Hotel in Point Clear, Alabama, Jones guides a seemingly random group to ask specific questions inspired by his curious advice that “You can’t believe everything you think.” Those questions lead to answers for which people have been searching for centuries: How do we begin to change the culture in which we live? What is the key to creating a life of success and value? What if what we think is the end...is only the beginning? What starts as a story of one person's everyday reality unfolds into the extraordinary principles available to anyone looking to create the life for which they were intended.

This book is not a dictionary, though it tells you all you need know about everything from Authenticity to Zips. It's not an autobiography, though it does offer a revealing and highly personal inside view of contemporary culture. It's an essential tool kit for understanding the modern world. It's about what makes a Warhol a genuine fake; the creation of national identities; the mania to collect. It's also about the world seen from the rear view mirror of Grand Theft Auto V; digital ornament and why we value imperfection. It's about drinking a bruisingly dry martini in Adolf Loo's American bar in Vienna, and about Hitchcock's film sets. It's about fashion and technology, about politics and art.
