~~Impact of Capital Flight on Exchange Rate and Economic ...~~

Capital flight, in economics, occurs when assets or money rapidly flow out of a country, due to an event of economic consequence or as the result of economic globalization. Such events could be an increase in taxes on capital or capital holders or the government of the country defaulting on its debt that disturbs investors and causes them to lower their valuation of the assets in that country, or otherwise to lose confidence in its economic strength. This leads to a disappearance of wealth, and
