The former chief executive of the Post Office has quit her roles on the boards of Morrisons and Dunelm following the IT scandal which led to the wrongful convictions of former postmasters.

Former bank manager Ronald Dalton never got to watch his three young children grow up. In 1989 he was convicted for a crime that never happened. His wife, Brenda, was later ruled to have choked to death on breakfast cereal not strangled as a pathologist had initially claimed. Dalton's daughter, Alison, was in kindergarten when he was charged with second-degree murder in 1988. He attended her high school graduation on June 26, 2000, two days after his conviction was finally overturned. Behind the proud facade of Canada's criminal justice system lie the shattered lives of the people unjustly caught within its web. Justice Miscarried tells the heartwrenching stories of twelve innocent Canadians, including David Milgaard, Donald Marshall, Guy Paul Morin, Clayton Johnson, William Mullins-Johnson, and Thomas Sophonow, who were wrongly convicted and the errors in the nations justice system that changed their lives forever.

This booklet provides a brief guide for persons accused and/or convicted of crimes they did not commit. The guide is intended for miscarriage of justice victims and those working to overturn the wrongful conviction.

Compelling and engagingly written, this book by former Attorney General of Ohio Jim Petro and his wife, writer Nancy Petro, takes the reader inside actual cases, summarizes extensive research on the causes and consequences of wrongful conviction, and exposes eight common myths that inspire false confidence in the justice system and undermine reform. Now newly published in paperback with an extensive list of web links to wrongful conviction sources internationally, False Justice is ideal for use in a wide array of criminal justice and criminology courses. Myth 1: Everyone in prison claims innocence. Myth 2: Our system almost never convicts an innocent person. Myth 3: Only the guilty confess. Myth 4: Wrongful conviction is the result of innocent human error. Myth 5: An eyewitness is the best testimony. Myth 6: Conviction errors get corrected on appeal. Myth 7: It dishonors the victim to question a conviction. Myth 8: If the justice system has problems, the pros will fix them.

Misleading DNA Evidence: A Guide for Scientists, Judges, and Lawyers presents the reasons miscarriages of justice can occur when dealing with DNA, what the role of the forensic scientist is throughout the process, and how judges and lawyers can educate themselves about all of the possibilities to consider when dealing with cases that involve DNA evidence. DNA has become the gold standard by which a person can be placed at the scene of a crime, and the past decade has seen great advances in this powerful crime solving tool. But the statistics that analysts can attach to DNA evidence often vary, and in some cases the statistical weight assigned to that match, can vary enormously. The numbers provided to juries often overstate the evidence, and can result in a wrongful conviction. In addition to statistics, the way the evidence is collected, stored and analyzed can also result in a wrongful conviction due to contamination. This book reviews high-profile and somewhat contentious cases to illustrate these points, including the death of Meredith Kercher. It examines crucial topics such as characterization of errors and determination of error rates, reporting DNA profiles and the source and sub-source levels, and the essentials of statement writing. It is a concise, readable resource that will help not only scientists, but legal professionals with limited scientific backgrounds, to understand the intricacies of DNA use in the justice system. Ideal reference for scientists and for those without extensive scientific backgrounds Written by one of the pioneers in forensic DNA typing and interpretation of DNA profiling results Ideal format for travel, court environments, or wherever easy access to reference material is vital

Rodricus Crawford was sentenced to die for the murder of his beautiful baby boy. After years on death row, evidence confirmed what Crawford had claimed all along: he was innocent, and his son had died from an undiagnosed illness. In Smoke but No Fire, former New York City public defender Jessica S. Henry tells the heartbreaking stories of innocent people convicted of crimes that simply never occurred. A suicide is mislabeled a homicide. An accidental fire is mislabeled an arson. A false allegation of assault is invented to resolve a custody dispute. Henry exposes a deeply flawed criminal justice system that allows—even encourages—these no-crime wrongful convictions to regularly occur. This eye-opening book grapples with the chilling reality that far too many innocent people spend real years behind bars for fictional crimes.

Compelling and engagingly written, this book by former Attorney General of Ohio Jim Petro and his wife, writer Nancy Petro, takes the reader inside actual cases, summarizes extensive research on the causes and consequences of wrongful conviction, and exposes eight common myths that inspire false confidence in the justice system and undermine reform. Now newly published in paperback with an extensive list of web links to wrongful conviction sources internationally, False Justice is ideal for use in a wide array of criminal justice and criminology courses. Myth 1: Everyone in prison claims innocence. In fact, guilt is usually clear and undisputed either because the criminal was caught in the act, left substantial evidence, or made the decision to take a plea. While taking a plea does not assure guilt, often a combination of the above reveals the soundness of the defendant's decision

to plead rather than go to trial. Lauren McGarity, a mediator, conflict resolution expert, and educator who has worked with hundreds of Ohio inmates for ten years, dispelled this myth for us in *False Justice*. Myth 2: Our system almost never convicts an innocent person. We mined and share the research and opinion of both conservatives and liberals, and we have concluded that the 311 persons exonerated of serious felonies to date, December 12, 2013, by DNA technology (which was first employed in criminal forensics in the U.S. in the late 1980s) must be the tip of the iceberg, a phrase commonly mentioned in our research. Following the Elkins experience, Nancy and I suspected a substantial number of innocent people in our prisons, but our research required that we frequently revise our thinking upward. Estimates have ranged from, conservatively, about one thousand to as many as tens of thousands of innocent people in American prisons today. We believe -- and research and logic suggest -- that our system convicts innocent persons far more frequently than most imagine and that most Americans, if more fully informed, would consider this a national travesty. Myth 3: Only the guilty confess. Stephen Boorn confessed to a murder in Manchester, Vermont, even though there was no trace of evidence, including a body. Boorn is not alone. *False Justice* explores what prompted Christopher Ochoa and others falsely accused of murder to incriminate themselves. We explore why the Miranda warning failed in these cases to provide intended protections. Myth 4: Wrongful conviction is the result of innocent human error. As chief legal officer of Ohio, I supervised a staff of 1,250, including 350 lawyers, who managed more than 35,000 active legal cases at a time. Yet I was totally unaware of the extent of wrongful criminal conviction, and was disappointed to learn that misconduct by police and prosecutors has contributed to many wrong verdicts. In the first edition of *False Justice* we noted that official misconduct was identified early as a contributor in DNA-proven wrongful convictions. Prosecutorial misconduct was a factor in thirty-three of the first seventy-four DNA exonerations (44.6 percent) and police misconduct was present in thirty-seven, or exactly half of those cases.³ Subsequent exonerations have supported the finding that official misconduct is a significant contributor to wrongful conviction. The National Registry of Exonerations reports at this writing (Dec. 14, 2013) 564 known cases of official misconduct--both police and prosecutor and in some cases both--in its universe of 1,262 exonerations, or in 44.6 percent of known exonerations since 1989.⁴ This book challenges thinking on what tactics should and should not be dismissed as "human error." Myth 5: An eyewitness is the best testimony. Mistaken eyewitness testimony, a contributor in 75 percent of wrongful convictions, was the prevailing contributor to wrongful conviction in the cases of Elkins, Green, Gillispie, and others included in the book. *False Justice* shares highlights of what we now know about memory and how this has shaped legislative and procedural reforms that will enable more accurate capture of eyewitness testimony. Myth 6: Conviction errors get corrected on appeal. The long, difficult, and expensive struggle to reverse a conviction is demonstrated in the Boorn, Elkins, Green, and Gillispie cases. Our appeals process addresses only certain errors that may have occurred in preparation of the case or in the courtroom. Post-conviction relief is difficult to attain in a system that properly seeks finality in the criminal process. The other route to correcting a conviction error is through new evidence, which, as indicated in Elkins and Gillispie, must meet specific requirements that are very difficult to achieve. Myth 7: It dishonors the victim to question a conviction. *False Justice* reveals that, contrary to a popular opinion, only a minority of convicted persons claim innocence and represent cases that are worthy of post-conviction DNA analysis. Prosecutors who oppose access to post-conviction DNA evidence, which could conclusively prove guilt or innocence, frequently claim that this would dishonor the victim. Public safety requires that we abandon this myth, or understand that by allowing the real perpetrators to escape justice, we contribute to an increase in crime and victims. How does that honor victims? Myth 8: If the justice system has problems, the pros will fix them. While most men and women who work in the criminal justice system are well meaning, committed, and deserving of our respect, they typically do not have the authority, resources, perspective, time, or inclination to change the system. *False Justice* recommends reforms achieved through legislation, policy, and court opinion. However, these will not occur with any urgency until conventional wisdom catches up with the truths revealed in this DNA age. Therefore, it will take us -- everyday American citizens -- not the pros, to accelerate this process. By abandoning myths and advocating reforms, we will not only reduce the destruction that comes with wrongful conviction but will also make the United States safer.

The New York Times best selling true story of an unlikely friendship forged between a woman and the man she incorrectly identified as her rapist and sent to prison for 11 years. Jennifer Thompson was raped at knifepoint by a man who broke into her apartment while she slept. She was able to escape, and eventually positively identified Ronald Cotton as her attacker. Ronald insisted that she was mistaken-- but Jennifer's positive identification was the compelling evidence that put him behind bars. After eleven years, Ronald was allowed to take a DNA test that proved his innocence. He was released, after serving more than a decade in prison for a crime he never committed. Two years later, Jennifer and Ronald met face to face-- and forged an unlikely friendship that changed both of their lives. With Picking Cotton, Jennifer and Ronald tell in their own words the harrowing details of their tragedy, and challenge our ideas of memory and judgment while demonstrating the profound nature of human grace and the healing power of forgiveness.

Innocent graphically documents forty-two recent criminal cases to find evidence of shocking miscarriages of justice, especially in murder cases. Based upon interviews with more than 200 people and reviews of hundreds internal case files, court records, smoking-gun memoranda, and other documents, Scott Christianson gets inside the legal cases, revealing the mistakes, abuses, and underlying factors that led to miscarriages of justice, while also describing how determined prisoners, post-conviction attorneys, advocates, and journalists struggle against tremendous odds to try to win their exonerations. The result is a powerful work that recounts the human costs of a criminal justice system gone awry, and shows us how wrongful convictions can--and do--happen everywhere.

Looks at judicial error and wrongful conviction in Canada, including the cases of David Milgaard, Donald Marshall, Guy Paul Morin, and Clayton Johnson.

“A chilling piece of journalism” from the bestselling author of *Wrecking Crew: Demolishing the Case Against Steven Avery* (Ron Franscell, author of *Alice & Gerald*). In this thrilling true crime book, bestselling and award-winning author John Ferak explores the murder, investigation, trial, conviction and eventual exoneration—the largest such ever in the United States—of the Beatrice 6. On February 5, 1985, one of the coldest nights on record, Beatrice, Nebraska widow Helen Wilson was murdered inside her second-floor apartment. The news of six arrests was absolutely stunning to the locals in this easy-going, blue-collar community of 12,000 residents. But why were six loosely connected misfits who lived as far away as Alabama, Colorado and North Carolina being linked to the rape and murder of a beloved small-town widow? After all six of the condemned were convicted of murder and sent away to prison for the ghastly crime, the town moved on, convinced that justice was served. For more than twenty-five years, the Beatrice 6 rotted in prison, until the unthinkable occurred in 2008 . . . In *Failure of Justice*, John Ferak delivers a “riveting account . . . [of] an overzealous police investigation that generated false confessions and false evidence. The unbelievable story of the Beatrice 6 provides a wake-up call at a time when serious wrongful convictions continue to come to light with disturbing frequency” (Brandon L. Garrett, Justice Thurgood Marshall Distinguished Professor of Law, University of Virginia School of Law). “One of the most bizarre stories I’ve ever heard of.”—Burl Barer, Edgar Award-winning true-crime author, host of Outlaw radio’s True Crime Uncensored
