Landscape Construction, 3rd edition, will help your students understand the process of construction and implementation of a multitude of exterior hardscape construction projects. This book begins with the preparation for construction and follows through to the installation of the final elements of the landscape project. Your students will appreciate the detailed discussions about site preparation, grading and drainage, utilities and irrigation, retaining wall construction, paving, exterior carpentry and fencing and free-standing walls. Such amenities as pools, ponds, and edging are also discussed in detail. All instructions are well supported by photos and illustrations. Each section contains thorough installation information for most of the contemporary materials used in today's landscapes. David Sauter has provided your students with expert perspective on materials and techniques, as well as easy-to-follow instructions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

California Friendly® is California's future. Water reliability is dependent on using water wisely. We need to create sustainable gardens that rely on less water. This maintenance guide will help you support California's future: *Uncover the secrets of efficient irrigation.* Explore the techniques for irrigating with recycled water. *Get the maintenance tips for hundreds of California Friendly® plants.* Discover the methods and means of managing weed and pest infestations. *Learn how to maintain rainwater capture opportunities. This book has been written for every landscaper, gardener and land manager in Southern California. It has been produced by the very first collaboration between three Southern California organizations, LADWP, MWD and SoCalGas. Grab a copy--they are free--use the information in your garden and help us create a beautiful, thriving and sustainable future.

Sustainable Landscape Management-A Guide to Care in the Desert Southwest is a part of the Urban Landscape Sustainability program created by Janet Waibel, landscape architect in Tempe, AZ. Developed for use by the landscape industry to generate more aesthetic and valuable urban landscapes to improve the urban lifestyle. Our outdoor spaces contribute greatly to the quality of life especially in Arizona where much of our time can be enjoyed outdoors. The Arizona publication is used by the Arizona Landscape Contractor's Association to offer the SLM curriculum for certification of landscape professionals. Companies with SLM certified staff are held to a high standard of excellence to properly care for our unique desert plant materials. Since 2010 over 4000 copies of the book have been sold.

A good lawn is very often the central feature of a modern garden, whether in town or the countryside. It therefore needs much more care and very often extra expert care than many of the other plants in the garden. The properly maintained lawn is no longer just an area of grass but the backdrop or canvas for the rest of the garden. If the lawn looks good, so will the rest of the garden. Although this manual has been written with the professional gardener or aspiring lawn care specialist in mind, many of the aspects of lawn care within the volume are no more than practical advice which will be of interest and use to both the professional and amateur. This manual is business-oriented and in fact starts with generic questions about starting up a business plan and focuses down to launching a properly constituted lawn care business. It also outlines all the pitfalls of not only being in business for yourself but the implications of employing people, as well as all the anticipated issues which can result from contracting. It is constructed in such a way that whether you are thinking of starting a lawn care business or whether you are already involved, there will be something of use to you. Everything is included from how to go about your accounting to making your business legal...with even a section on the correct tools to acquire. It is written by an experienced gardener who has created a successful lawn care business and who is now passing on his experience by highlighting both the positive and negative aspects of not only working within the horticultural industry but how to go about building a business from scratch. The manual is written in a very readable and sympathetic way rather than in a technical and prescriptive style, so that it
