Can machines write books? Can artificial intelligence be used for business? Will touch screens be around, or will they be replaced by voice recognition? What are deepfakes? How do self-driving cars work, and are they going to be a reality soon? These questions all come to light in this brief but informational book about artificial intelligence. Society is changing quickly because of automated systems in place that either benefit or undermine people's living style, jobs, and brains. Today, we explore what that future may hold. We will also look into options for civilians in today's modern world to adapt more quickly. Don't underestimate the rise of artificial intelligence. Understand the future. Why, fool, a Poet is as much as one should say, - a Poet!" And thou, reader, dost thou know what a hero is? Why, a hero is as much as one should say, - a hero! Some romance-writers, however, say much more than this. Nay, the old Lombard, Matteo Maria Bojardo, set all the church-bells in Scandiano ringing, merely because he had found a name for one of his heroes. Here, also, shall church-bells be rung, but more solemnly. The setting of a great hope is like the setting of the sun. The brightness of our life is gone. Shadows of evening fall around us, and the world seems but a dim reflection, - itself a broader shadow. We look forward into the coming, lonely night. The soul withdraws into itself. Then stars arise, and the night is holy. Paul Flemming had experienced this, though still young. The friend of his youth was dead. The bough had broken "under the burden of the unripe fruit." And when, after a season, he looked up again from the blindness of his sorrow, all things seemed unreal. Like the man, whose sight had been

restored by miracle, he beheld men, as trees, walking. His household gods were broken. He had no home. His sympathies cried aloud from his desolate soul, and there came no answer from the busy, turbulent world around him. He did not willingly give way to grief. He struggled to be cheerful, - to be strong. But he could no longer look into the familiar faces of his friends. He could no longer live alone, where he had lived with her. He went abroad, that the sea might be between him and the grave. Alas! Between him and his sorrow there could be no sea, but that of time.

No one, that is, except Maggie's dad, who vanished in the middle of an assignment. Now, an elf named Killian has shown up with a gig. Futurist Gerd Leonhard breaks new ground again by bringing together mankind's urge to upgrade and automate everything-down to human biology itself-with our timeless quest for freedom and happiness. Before it's too late, we must stop and ask the big questions: How do we embrace technology without becoming it? When it happens-gradually, then suddenly-the machine era will create the greatest

watershed in human life on Earth. Technology vs. Humanity is one of the last moral maps we'll get as humanity enters the Jurassic Park of Big Tech. Artificial intelligence. Cognitive computing. The Singularity. Digital obesity. Printed food. The Internet of Things. The death of privacy. The end of work-as-we-know-it, and radical longevity: The imminent clash between technology and humanity is already rushing towards us. What moral values are you prepared to stand up for-before being human alters its meaning forever? Gerd Leonhard is a new kind of futurist schooled in the humanities as much as in technology. In his most provocative book to date, he explores the exponential changes swamping our societies, providing rich insights and deep wisdom for business leaders, professionals and anyone with decisions to make in this new era. If you take being human for granted, press Reset now with this passionately argued call to create a genuinely braver new world.
