There are several threats that
include risks to service and
network that have yet to be
calculated. According to the Cloud
Security Alliance (CSA), they
have discovered several threats to
cloud computing, that includes
abuse and nefarious use of cloud
computing. The top threat is the

System Threats. Patches and
updates. Failure to update
systems, particularly when a patch
is issued, is a serious database
security risk. Whenever public
notice is given about a new patch,
hackers are made aware of a
weakness and look for systems
that have not yet been updated.
Therefore, staying on top of
software updates is vital.
