unstable wake of the Second World War. To the complex problem of understanding the ways in which the post-war nations were jostling for power, Morgenthau brought a comprehensive schema: the concept of “ realism ” – or, in other words, the idea that every nation will act so as to maximise its own interests. From this basis, Morgenthau builds a systematic argument for a pragmatic approach to international relations in which nations seeking consensus should aim for a balance of power, grounding relations between states in understandings of how the interests of individual nations can be maximized. Though seismic shifts in international politics after the Cold War undeniably altered the landscape of

Hans J. Morgenthau, a founding proponent of political realism, remains the central figure in international relations scholarship of the twentieth century. His book *Politics among Nations* literally defined the field in 1948 as it heralded the post--World War II paradigm shift in American thinking about diplomacy. Yet when Morgenthau died in 1980 at the age of seventy-six, no one present at his funeral had an inkling about the first half of his life -- his education, his early productive career in Europe and America, or the roots of his political philosophy. In the first and only volume devoted to the intellectual formation of Morgenthau, Christoph Frei draws upon an overwhelming abundance

of resources -- including a lengthy paper trail of previously unseen diaries, correspondence, notes, and manuscripts -- to disclose the compelling story of a great mind in the making. Frei identifies the bases of Morgenthau's ideas and clarifies many misconceptions, including Morgenthau's link with Augustinian thought, his relationship with Reinhold Niebuhr, and the impact of major thinkers such as Max Weber, Hans Kelsen, and Carl Schmitt on the scholar. He offers incontrovertible evidence of Friedrich Nietzsche's predominant influence on Morgenthau. Resoundingly praised in the original German, Hans J. Morgenthau is a brilliant life study that presents the first coherent picture of the European intellectual building blocks

It also innovatively considers certain ' alternative format ' classics such as Kubrick ' s satire on the nuclear arms race, Dr Strangelove, and Errol Morris ' s powerful documentary on war and US foreign policy, The Fog of War. With an international cast of contributors, many of them leading authorities on their
