To succeed in life, you must top your class, get Band One for school tests, and obtain four A stars for the PSLE. Or at least, that is the world according to Ling, a typical Singaporean mum who has made it her goal in life to help her children succeed in school. Ling's older daughter, April, has all the makings of a model student and looks set to ace the Primary Six national exams. In the meantime, Ling's younger son, Noah, is free-spirited and more interested in canteen food than what goes on in class. This (almost) kiasu mum records her journey diary-style, describing hilarious episodes involving crazy worksheets, assessment book overload and jittery parent-teacher meetings. Ling's humorous take on surviving Singapore schools will have you laughing and give you serious food for thought, all at the same time!

"Beyond the Tiger Mom is a brilliant book—hard-hitting and brutally honest but also balanced, insightful, and funny." —Amy Chua, author of *Battle Hymn of the Tiger Mom* Dispel the hype and myths about Asian parenting and uncover the practical with this effective parenting guide. Help your child achieve maximum academic potential Train your child to expand his or her attention span Find the right balance between work and play Help your child see failure as a learning experience Learn how to raise tech-healthy kids How do Asian parents prime their children for success from a young age? Why do Asian kids do so well in math and science? What is the difference between an Asian upbringing and a Western one? Why do some Asian mothers see themselves as "tiger moms" while others shun the label? How do Asian parents deal with their children's failures? Is it sometimes good for children to fail? These are just a few of the compelling questions posed and answered in this fascinating new parenting book by educator Maya Thiagarajan as she examines the stereotypes and goes beneath the surface to explore what really happens in Asian households. How do Asian parents think about childhood, family and education—and what can Western parents learn from them? Through interviews with hundreds of Asian parents and kids, Thiagarajan offers a detailed look at their values, hopes, fears and parenting styles. Woven into this narrative are her own reflections on teaching and parenting in Asia and the West. Thiagarajan synthesizes an extensive body of research to provide accessible and practical guidelines for parents. Each chapter ends with a "How To" section of specific tips for Asian and Western parents to aid their child's educational development both inside and outside the classroom.

In the context of increasingly multi-religious, multi-racial and multi-ethnic modern societies, the achievement of harmony is emerging as a major challenge. This book examines the idea of harmony, and its place in politics and governance, both in theory and practice, in Asia, the West and elsewhere.

Read Book Psle Chinese Exam Paper

After getting bad marks in Chinese class, Cedric is determined to do better, but he experiences difficulty learning the language. He then meets an alien who wants to help change him. Will he succeed in getting good grades?

The author shares the "secrets" of his successful learning in Math with readers in simple and clear terms. It takes the readers to discover the study techniques needed in Math and unleash their individual potential. It is the perfect book for students, parents, educators and anyone who wants to enhance their Math learning. If you want to excel in Mathematics, this is the book for you!

This report from the Education Committee looks at the administration of examinations for 15-19 year olds in England. The Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content. Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated. The Committee considers a number of options to change incentives, including: (i) A single board. This offers a simpler system, with no risk of competition, but the Committee believes the cost, risk and disruption outweigh the benefits; (ii) Franchising of subjects to exam boards. This removes syllabus competition, but again has downsides; (3) Or the current system of multiple boards. The Committee sees no benefit in competition on syllabus content, but the setting and marking of exams and associated administration, if properly regulated, could generate incentives and drive quality up, offering value for money to schools and colleges. The Committee also recommends the development of national syllabuses, accredited by Ofqual. The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate.
