This title examines one of the worlds critical issues, biological and chemical warfare. Readers will learn the historical background of this issue leading up to its current and future impact on society. The Hague Peace Conventions, the Geneva Protocol, and the Chemical Weapons Convention are discussed in detail. Programs that protect the United States against biological or chemical attack are also introduced. Engaging text, informative sidebars, and color photographs present information realistically, leaving readers with a thorough, honest interpretation of biological and chemical warfare. Features include a timeline, facts, additional resources, Web sites, a glossary, a bibliography, and an index. Essential Issues is a series in Essential Library, an imprint of ABDO Publishing Company.

language teaches students to write and debug programs at the machine level. Based on the Intel processor family, the text simplifies and demystifies concepts that students need to grasp before they can go on to more advanced computer architecture and operating systems courses. Students put theory into practice through writing software at the machine level, creating a memorable experience that gives them the confidence to work in any OS/machine-oriented environment. Proficiency in one other programming language, preferably Java, C, or C++, is recommended.
