About Us | Facultatea de Automatică și Calculatoare  
Signals and Systems. Semester 1. This course serves to introduce students to the input-output mode of thinking. Students will be taught how to translate the everyday notions of cause and effect into input-output models. They will be required to study, understand and use a set of mathematical tools for describing and analyzing inputs and outputs and the relationships between them.

Written with student centred, pedagogically driven approach, the text provides a self-contained introduction to the theory of signals and systems. This book looks at the concepts of systems, and also examines signals and the way that signals interact with physical systems. It covers topics ranging from basic signals and sys
