and Radio Frequency ID (RFID) within reach of the mass-market. The .NET 2.0 Framework and .NET 2.0 Compact Framework provide a number of APIs for communicating through these technologies and this book demonstrates these in the form of a number of practical projects that readers can undertake to build their own network additions.

This report informs law enforcement, incident response team members, & forensic examiners about the capabilities of present day forensic software tools that have the ability to acquire information from cell phones operating over CDMA (Code Division Multiple access), TDMA (Time Division Multiple Access), GSM (Global System for Mobile communications) networks & running various operating
