Juan Méndez has experienced human rights abuse first hand. As a result of his work with political prisoners in the late 1970s, the Argentinean military dictatorship arrested, tortured, and held him for more than a year. During that time, Amnesty International adopted him as a "Prisoner of Conscience." After his release, he moved to the United States and continued his lifelong fight for the ...

During that time, Amnesty International adopted him as a "Prisoner of Conscience." After his release, he moved to the United States and continued his lifelong fight for the rights of others, and the lessons he has gleaned over the decades can help us with our current struggles. Here, he sets forth an authoritative and incisive examination of torture, detention, exile, armed conflict, and genocide, whose urgency is even greater in the wake of America's recent disastrous policies. Méndez offers a new strategy for holding governments accountable for their actions, providing an essential blueprint for

America's most prominent legal mind and the #1 bestselling author of *Chutzpah* and *The Best Defense*, Alan Dershowitz, recounts his legal autobiography, describing how he came to the law, as well as the cases that have changed American jurisprudence over the past 50 years, most of which he has personally been involved in. In *Taking the Stand*, Dershowitz reveals the evolution of his own thinking on such fundamental issues as censorship and the First Amendment, Civil Rights, Abortion, homicide and the increasing role that science plays in a legal defense. Alan Dershowitz, the Felix Frankfurter Professor of Law at Harvard University, and the author of such acclaimed bestsellers as *Chutzpah*, *The Best Defense*, and *Reversal of Fortune*, for the first time recounts his legal biography, describing his struggles academically at Yeshiva High School growing up in Williamsburg, Brooklyn, his successes at Yale, clerking for Supreme Court Justice Arthur Goldberg, his appointment to full professor at the Harvard at age 28, the youngest in the school's history. Dershowitz went on to work on many of the most celebrated cases in the land, from appealing (successfully) Claus Von Bulow's conviction for the murder of his wife Sunny, to the O.J. Simpson trial, to defending Mike Tyson, Leona Helmsley, Patty Hearst, and countless others. He is currently part of the legal team advising Julian Assange.

*New and Selected Poems* includes more than fifty poems from Marjory Wentworth's previous three collections, *Noticing Eden*, *Despite Gravity*, and *The Endless Repetition of an Ordinary Miracle*, plus twenty-eight new poems. This collection serves as a capstone to Wentworth's tenure as South Carolina poet laureate, a title she has held since 2003. Thematically Wentworth's poems invite us to view nature as a site of reflection and healing, to consider the power of familial bonds and friendships, and to broaden our awareness of human rights and social justice. Regional settings appear throughout, indicative of Wentworth's commitment to represent her adopted home state of South Carolina in her work. She skillfully employs a variety of forms, from prose poems to sonnets to elegies to list poems, making for a varied and interesting trek through this "best of" collection of her poems to date. This collection includes a foreword by the poet Carol Ann Davis, author of *Psalm* and *Atlas Hour* and assistant professor of English at Fairfield University.

During the past several decades, the international human rights movement has had a crucial hand in the struggle against totalitarian regimes, cruelties in wars, and crimes against humanity. Today, it grapples with the war against terror and subsequent abuses of government power. In *The International Human Rights Movement*, Aryeh Neier--a leading figure and a founder of the contemporary movement--offers a comprehensive and authoritative account of this global force, from its beginnings in the seventeenth and eighteenth centuries to its essential place in world affairs today. Neier combines analysis with personal experience, and gives a unique insider's perspective on the movement's goals, the disputes about its mission, and its rise to international importance. Discussing the movement's origins, Neier looks at the dissenters who fought for religious freedoms in seventeenth-century England and the abolitionists who opposed slavery before the Civil War era. He pays special attention to the period from the 1970s onward, and he describes the growth of the human rights movement after the Helsinki Accords, the roles

played by American presidential administrations, and the astonishing Arab revolutions of 2011. Neier argues that the contemporary human rights movement was, to a large extent, an outgrowth of the Cold War, and he demonstrates how it became the driving influence in international law, institutions, and rights. Throughout, Neier highlights key figures, controversies, and organizations, including Amnesty International and Human Rights Watch, and he considers the challenges to come. Illuminating and insightful, *The International Human Rights Movement* is a remarkable account of a significant world movement, told by a key figure in its evolution.

The esteemed Harvard lawyer describes his career and the cases that have changed American jurisprudence throughout the past half century, discussing his early academic struggles, his clerking work for Supreme Court Justice Arthur Goldberg, and his role in many prominent cases.

*Controversy of the Ages* carefully analyzes the debate by giving it perspective. Rather than offering arguments for or against a particular viewpoint on the age of the earth, the authors take a step back in order to put the debate in historical and theological context. The authors of this book demonstrate from the history of theology and science controversy that believers are entitled to differ over this issue, while still taking a stand against theistic evolution. But by carefully and constructively breaking down the controversy bit by bit, they show why the age issue is the wrong place to draw a line in the sand.

This book is a sequel to *The Greatest Lie on Earth (Expanded Edition): Proof That Our World Is Not a Moving Globe*. It will primarily focus on the infiltration into the church of the superstitious myth of heliocentrism and how that infiltration has served to undermine the gospel. The gospel is the entire Holy Bible, not just some of it. Matthew 4:4. Christian belief is an all or nothing proposition. "All scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness." 2 Timothy 3:16. God's account of his creation is part and parcel of the gospel. A person with genuine faith believes what Jesus said about both heavenly and earthly things. "If I have told you earthly things, and ye believe not, how shall ye believe, if I tell you of heavenly things?" John 3:12. Jesus is God. Jesus created all things in heaven and on earth. See Colossians 1:16-18. God has revealed himself through his creation. "[T]hat which may be known of God is manifest in them; for God hath shewed it unto them. For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead; so that they are without excuse." Romans 1:19-20. If men have a misunderstanding of God's creation, they will also have a misunderstanding of who God is. If people believe in a creation that does not exist, they consequently also believe in a creator that does not exist. It is essential, therefore, to have an accurate understanding of God's creation. God did not make a movable, spherical earth. If men believe in a heliocentric creation, they will necessarily believe in a heliocentric creator. A heliocentric creation does not exist. So also, a heliocentric creator does not exist. A heliocentric creator is a false god. We have been warned to avoid the preaching of a false gospel, which presents a false Jesus. "For if he that cometh preacheth another Jesus, whom we have not preached, or if ye receive another spirit, which ye have not received, or another gospel, which ye have not accepted, ye might well bear with him." 2 Corinthians 11:4.

Today many school students are shielded from one of the most important concepts in modern science: evolution. In engaging and conversational style, *Teaching About Evolution and the Nature of Science* provides a well-structured framework for understanding and teaching evolution. Written for teachers, parents, and community officials as well as scientists and educators, this book describes how evolution reveals both the great diversity and similarity among the Earth's organisms; it explores how scientists approach the question of evolution; and it illustrates the nature of science as a way of knowing about the

natural world. In addition, the book provides answers to frequently asked questions to help readers understand many of the issues and misconceptions about evolution. The book includes sample activities for teaching about evolution and the nature of science. For example, the book includes activities that investigate fossil footprints and population growth that teachers of science can use to introduce principles of evolution. Background information, materials, and step-by-step presentations are provided for each activity. In addition, this volume: Presents the evidence for evolution, including how evolution can be observed today. Explains the nature of science through a variety of examples. Describes how science differs from other human endeavors and why evolution is one of the best avenues for helping students understand this distinction. Answers frequently asked questions about evolution. Teaching About Evolution and the Nature of Science builds on the 1996 National Science Education Standards released by the National Research Council--and offers detailed guidance on how to evaluate and choose instructional materials that support the standards. Comprehensive and practical, this book brings one of today's educational challenges into focus in a balanced and reasoned discussion. It will be of special interest to teachers of science, school administrators, and interested members of the community.
