The Intranet Portal Guide: How to Make the Business Case ...

A portal is in effect a gateway that allows your intranet or extranet to connect with a range of external enterprise systems or apps. These commonly include customer relationship management software or human resources applications. The portal will, therefore, bring together all these tools in one platform and requires just a single sign-on.

Intranets & Team Sites | Microsoft 365

An Intranet An intranet is a private network that is only accessible to you and your employees. People outside your company would not be able to access your intranet. An excellent example of this is creating an internal community or business website that is not accessible to the general public.

How to Setup a WordPress Intranet + Best 5 Wordpress ...

A SharePoint intranet can have at least four different incarnations. 1. A SharePoint intranet as an on-premises solution is a corporate portal built on top of any version of SharePoint Server (2003, 2007, 2010, 2013, 2016, or 2019). Organizations deploy it using their own infrastructure and take full responsibility for their intranet customization, management, and support.
