Remedial education (also known as developmental education, basic skills education, compensatory education, preparatory education, and academic upgrading) is assigned to assist students in order to achieve expected competencies in core academic skills such as literacy and numeracy.

Remedial education - Wikipedia

Developmental state, or hard state, is a term used by international political economy scholars to refer to the phenomenon of state-led macroeconomic planning in East Asia in the late 20th century. In this model of capitalism, the state has more independent, or autonomous, political power, as well as more control over the economy. A developmental state is characterized by having strong state intervention, as well as extensive regulation and planning. The term has subsequently been used to describ

The State of Developmental Education is the first book to provide a thorough, comparative picture of how developmental education is carried out at higher education institutions and investigate how different state-level policies and priorities change the availability, types, and quality of developmental education available.

The State of Developmental Education captures the current condition of state developmental education policy as it is implemented in higher education institutions. Few studies have examined the role that policy plays in the implementation and execution of developmental education on campuses, particularly at four-year institutions. Parker, Bustillos, and Barrett examine state developmental education policies of five states by exploring the impact these policies have on institutions and documenting how institutional actors respond to these policies. If states and indeed the nation are to meet the educational attainment goals,

particularly bachelor's degree attainment, it is important that both four- and two-year colleges and universities share in the responsibility of educating students.

Developmental Education: Readings on Its Past, Present, and Future offers twenty-two selections on historical efforts to serve underprepared students, on the state of developmental education today, and on innovative practices and possible directions for the future. Compiled by Hunter R. Boylan, Director of the National Center for Developmental Education (NCDE) and a professor of Higher Education at Appalachian State University, and Barbara S. Bonham, a professor in the Department of Leadership and Educational Studies at Appalachian State University, each chapter also includes introductions and questions for discussion and reflection.

"Foundations of Developmental Education" provides a conclusive alternative to the traditional oversimplification of the pervasive education problem in the United States. Hashway chronicles the decline of education in the U.S. over the past fifty years and studies the factors that have supposedly affected the quality of education. Analyzing the educational system, Hashway provides sound recommendations and alternatives for the delivery of instructional services. The book begins with a thorough analysis of the developmental learning system followed by a case study. An overview of psychocybernetic models of thinking is then presented. Finally, the author examines educational applications of the developmental learning system.

'The Whole Child' is a practical methods book that explains how to teach young children in ways that foster healthy development. This text pictures the child as being made up of 'selves' - emotional, social, physical,

creative, and cognitive - and then examines each of those selves in turn.

The National Study of Developmental Education was funded by the Exxon Education Foundation. The project was designed to assess the efficacy of various courses and services provided in support of underprepared students enrolled in American colleges and universities. The initial study ran from 1989 through 1997 and examined various developmental program activities and outcomes from a randomly selected sample of 150 institutions and 6,000 students. The major goals were to identify the state of the art in developmental education, identify effective teaching and learning strategies, identify effective models for the delivery of developmental and learning assistance services, and identify future research issues for the field. Findings have been presented at a variety of professional conferences and have appeared in *Research In Developmental Education* and the *Journal of Developmental Education*.
