Topics. The following list covers some of the topics to be presented at Sustainable City 2020.

Sustainable City 2020 - Wessex Institute

Building sustainable cities and communities is important, because half of all humanity, around 3.5 billion people, currently live in urban areas, and it is predicted that around 60% of all populations will live in urban areas by 2030. Urban farming is a great solution for this goal. First of all, urban farming allows citizens and members of cities and communities to use the resource of space responsibly and sustainably. With urban farming, once unused and aesthetically unpleasing spaces can ...
