In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. *Liquid Modernity* concludes the analysis undertaken in Bauman's two previous books *Globalization: The Human Consequences* and *In Search of Politics*. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

The passage from 'solid' to 'liquid' modernity has created a new and unprecedented setting for individual life pursuits, confronting individuals with a series of challenges never before encountered. Social forms and institutions no longer have enough time to solidify and cannot serve as frames of reference for human actions and long-term life plans, so individuals have to find other ways to organise their lives. They have to

splice together an unending series of short-term projects and episodes that don't add up to the kind of sequence to which concepts like 'career' and 'progress' could meaningfully be applied. Such fragmented lives require individuals to be flexible and adaptable – to be constantly ready and willing to change tactics at short notice, to abandon commitments and loyalties without regret and to pursue opportunities according to their current availability. In liquid modernity the individual must act, plan actions and calculate the likely gains and losses of acting (or failing to act) under conditions of endemic uncertainty. Zygmunt Bauman's brilliant writings on liquid modernity have altered the way we think about the contemporary world. In this short book he explores the sources of the endemic uncertainty which shapes our lives today and, in so doing, he provides the reader with a brief and accessible introduction to his highly original account, developed at greater length in his previous books, of life in our liquid modern times.

The production of 'human waste' – or more precisely, wasted lives, the 'superfluous' populations of migrants, refugees and other outcasts – is an inevitable outcome of modernization. It is an unavoidable side-effect of economic progress and the quest for order which is characteristic of modernity. As long as large parts of the world remained wholly or partly unaffected by modernization, they were treated by modernizing societies as lands that were able to absorb the excess of population in the 'developed countries'. Global solutions were sought, and temporarily found, to locally produced overpopulation problems. But as modernization has reached the furthest lands of the planet, 'redundant population' is produced everywhere and all localities have to bear the consequences of modernity's global triumph. They are now confronted with the need to seek – in vain, it seems – local solutions to globally produced problems. The global spread of the modernity has given rise to growing quantities of human beings who are deprived of adequate means of survival, but the planet is fast running out of places to put them. Hence the new anxieties about 'immigrants' and 'asylum seekers' and the growing role played by diffuse 'security fears' on the contemporary political agenda. With characteristic brilliance, this new book by Zygmunt Bauman unravels the impact of this transformation on our contemporary culture and politics and shows that the problem of coping with 'human waste' provides a key for understanding some otherwise baffling features of our shared life, from the strategies of global domination to the most intimate aspects of human relationships.

With the advent of liquid modernity, the society of producers is transformed into a society of consumers. In this new consumer society, individuals become simultaneously the promoters of commodities and the commodities they promote. They are, at one and the same time, the merchandise and the marketer, the goods and the travelling salespeople. They all inhabit the same social space that is customarily described by the term the market. The test they need to pass in order to acquire the social prizes they covet requires them to recast themselves as products capable of drawing attention to themselves. This subtle and pervasive transformation of consumers into commodities is the most important feature of the society of consumers. It is the hidden truth, the deepest and most closely guarded secret, of the consumer society in which we now live. In this new book Zygmunt Bauman examines the impact of consumerist attitudes and patterns of conduct on various apparently unconnected aspects of social life politics and democracy, social divisions and stratification, communities and partnerships, identity building, the production and use

of knowledge, and value preferences. The invasion and colonization of the web of human relations by the worldviews and behavioural patterns inspired and shaped by commodity markets, and the sources of resentment, dissent and occasional resistance to the occupying forces, are the central themes of this brilliant new book by one of the worlds most original and insightful social thinkers.

Modernity was supposed to be the period in human history when the fears that pervaded social life in the past could be left behind and human beings could at last take control of their lives and tame the uncontrolled forces of the social and natural worlds. And yet, at the dawn of the twenty-first century, we live again in a time of fear. Whether its the fear of natural disasters, the fear of environmental catastrophes or the fear of indiscriminate terrorist attacks, we live today in a state of constant anxiety about the dangers that could strike unannounced and at any moment. Fear is the name we give to our uncertainty in the face of the dangers that characterize our liquid modern age, to our ignorance of what the threat is and our incapacity to determine what can and can't be done to counter it. This new book by Zygmunt Bauman one of the foremost social thinkers of our time is an inventory of liquid modern fears. It is also an attempt to uncover their common sources, to analyse the obstacles that pile up on the road to their discovery and to examine the ways of putting them out of action or rendering them harmless. Through his brilliant account of the fears and anxieties that weigh on us today, Bauman alerts us to the scale of the task which we shall have to confront through most of the current century if we wish our fellow humans to emerge at its end feeling more secure and self-confident than we feel at its beginning.

Zygmunt Bauman's new book is a brilliant exploration, from a sociological point of view, of the 'taboo' subject in modern societies: death and dying. The book develops a new theory of the ways in which human mortality is reacted to, and dealt with, in social institutions and culture. The hypothesis explored in the book is that the necessity of human beings to live with the constant awareness of death accounts for crucial aspects of the social organization of all known societies. Two different 'life strategies' are distinguished in respect of reactions to mortality. One, 'the modern strategy', deconstructs mortality by translating the insoluble issue of death into many specific problems of health and disease which are 'soluble in principle'. The 'post-modern strategy' is one of deconstructing immortality: life is transformed into a constant rehearsal of 'reversible death', a substitution of 'temporary disappearance' for the irrevocable termination of life. This profound and provocative book will appeal to a wide audience. It will also be of particular interest to students and professionals in the areas of sociology, anthropology, theology and philosophy.

There is nothing new about evil; it has been with us since time immemorial. But there is something new about the kind of evil that characterizes our contemporary liquid-modern world. The evil that characterized earlier forms of solid modernity was concentrated in the hands of states claiming monopolies on the means of coercion and using the means at their disposal to pursue their ends ends that were at times horrifically brutal and barbaric. In our contemporary liquid-modern societies, by contrast, evil has become altogether more pervasive and at the same time less visible. Liquid evil hides in the seams of the canvass woven daily by the liquid-modern mode of human interaction and commerce, conceals itself in the very tissue of human cohabitation and in the course of its routine and day-to-day reproduction.

Evil lurks in the countless black holes of a thoroughly deregulated and privatized social space in which cutthroat competition and mutual estrangement have replaced cooperation and solidarity, while forceful individualization erodes the adhesive power of inter-human bonds. In its present form evil is hard to spot, unmask and resist. It seduces us by its ordinariness and then jumps out without warning, striking seemingly at random. The result is a social world that is comparable to a minefield: we know it is full of explosives and that explosions will happen sooner or later but we have no idea when and where they will occur. In this new book, the sequel to their acclaimed work *Moral Blindness* Zygmunt Bauman and Leonidas Donskis guide the reader through this new terrain in which evil has become both more ordinary and more insidious, threatening to strip humanity of its dreams, alternative projects and powers of dissent at the very time when they are needed most.

This book is about the central figure of our contemporary, 'liquid modern' times – the man or woman with no bonds, and particularly with none of the fixed or durable bonds that would allow the effort of self-definition and self-assertion to come to a rest. Having no permanent bonds, the denizen of our liquid modern society must tie whatever bonds they can to engage with others, using their own wits, skill and dedication. But none of these bonds are guaranteed to last. Moreover, they must be tied loosely so that they can be untied again, quickly and as effortlessly as possible, when circumstances change – as they surely will in our liquid modern society, over and over again. The uncanny frailty of human bonds, the feeling of insecurity that frailty inspires, and the conflicting desires to tighten the bonds yet keep them loose, are the principal themes of this important new book by Zygmunt Bauman, one of the most original and influential social thinkers of our time. It will be of great interest to students and scholars in sociology and in the social sciences and humanities generally, and it will appeal to anyone interested in the changing nature of human relationships.

Modern civilization, Bauman argues, promised to make our lives understandable and open to our control. This has not happened and today we no longer believe it ever will. In this book, now available in paperback, Bauman argues that our postmodern age is the time for reconciliation with ambivalence, we must learn how to live in an incurably ambiguous world.

Zygmunt Bauman is one of the leading figures in contemporary social thought. His work ranges across issues of ethics, culture and politics. It never forgets that social thought ought to help men and women make sense of their lives and aspire towards something different. His books and essays always focus on the here and now: violence and moral indifference, globalization, consumerism, politics and individualization. They cast a sharp eye on the panaceas of 'there is no alternative'; the embrace of community and the fads of the 'counselling boom'; through which men and women are told that they can achieve biographical solutions to what are, in fact, systemic problems. In this new book, Zygmunt Bauman and Keith Tester engage in five accessible conversations that uncover and explore the assumptions and commitments underpinning Bauman's ground-breaking social thought. The conversations show how those commitments have influenced Bauman's analyses of modernity, postmodernity and 'liquid modernity'. The book ranges widely, from autobiographical reflection through to pointers for the understanding and future of Bauman's social thought. The conversations illustrate the moral substance of

Read PDF Zygmunt Bauman Book

Bauman's refusal to accept that the world cannot be made different. They show why social thought is a human necessity. Conversations with Zygmunt Bauman is a book which will offer fresh insight into Bauman's work for those who are familiar with it, and provide an engaging and helpful entry point for those who are new to it.
